

CHILDHOOD COMMUNITY LEADER STAKEHOLDER SURVEY 2025

SUMMARY OF RESULTS

QUOTES FROM STAKEHOLDERS

“Community leaders support early childhood programs to foster a network of shared resources, facilitate timely early intervention, and strengthen collaborative efforts. These combined actions directly contribute to ensuring our children’s safety, health, and ultimately, their success as lifelong learners.”

“It is a great resource for community members that are not actively involved in the community to find out what resources are out there.”

“There needs to be action planning on next steps. We are able to learn more about resources but what are we, as a group, doing with the information to make change in the community.”

“I have appreciated hearing information from other organizations within the state and about the work being done to support children/families and increasing my knowledge of resources.”
